

New patient ADHD shared care transfer request

Thank you for registering with us at Claypath & University Medical Group.

When you register with a new surgery, ADHD medications you had on “repeat” at any previous surgery under a shared care agreement **do not** automatically carry over to our surgery. This is for safety reasons. Our doctors ultimately take responsibility for any prescription we issue, even if the course was initiated by a doctor elsewhere, so we like to make sure that the medication is right for you.

Please complete the below form with as much information as you can. If you don't know the answer to any part, leave the section blank. Please return the form to A83011.prescriptionrequests@nhs.net. Please note, this email address is not monitored for more general queries.

Our approach to shared-care agreements can be found at: <https://durhamstudenthealth.co.uk/adhd-information/>

Your name	
Date of Birth	
NHS Number <small>If known</small>	
Address	
Previous GP Surgery <small>Name and Town</small>
